

A CRM APPLICATION TO MANAGE THE BOOKING OF CO -LIVING

BY

MOHAMMAD RIZWAN

mohammadrizwan15810@gmail.com

PROJECT ABSTRACT

A CRM Application to Manage the Booking of Co-Living

Our co-living space project aims to create a vibrant and inclusive community where individuals can live, work, and connect with like-minded people. We believe that living together in a shared environment fosters collaboration, reduces isolation, and enhances the overall quality of life.

The co-living space will feature a carefully designed layout that balances privacy and communal areas. Co-living Space is an application where customer Details is stored in order to choose the different AC rooms with Multiple Sharing. Special foods items will be selected by the user in Daily and make Payments in different modes. And Also give the feedback of the service like Room cleaning, internet connection and foods etc...

1. Salesforce

INTRODUCTION :-

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you. Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3IGde5k>

SALESFORCE:-

- Creating Developer Account
- Account Activation

TASK 1 :- Creating Developer Account

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>

2. On the sign up form, enter the following details :

- 1. First name & Last name**
- 2. Email**
- 3. Role : Developer**
- 4. Company : College Name**
- 5. County : India**
- 6. Postal Code : pin code**

Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in the format :

username@organization.com

Click on sign me up after filling these.

TASK 2 :- Account Activation

- 1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.**

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

The screenshot shows the "Change Your Password" page. At the top, there's a large blue cloud icon. Below it, the heading "Change Your Password" is displayed. The page instructs the user to "Enter a new password for lead@sb.com" and "Make sure to include at least:" followed by three requirements: "8 characters", "1 letter", and "1 number". A red box highlights the "New Password" field, which contains "*****" and is labeled "Good". Another red box highlights the "Confirm New Password" field, which also contains "*****" and is labeled "Match". Below these fields is a "Security Question" section with a dropdown menu set to "In what city were you born?". A red box highlights the "Answer" field, which contains "asdfghjkl". At the bottom, a large blue "Change Password" button is highlighted with a red box.

4. when you will redirect to your salesforce setup page.

2. Object

INTRODUCTION :-

What Is an Object?

Salesforce objects are database tables that permit you to store data that is specific to an organization. What are the types of Salesforce objects

Salesforce objects are of two types:

1. Standard Objects: Standard objects are the kind of objects that are provided by salesforce.com such as users, contracts, reports, dashboards, etc.

2. Custom Objects: Custom objects are those objects that are created by users. They supply information that is unique and essential to their organization. They are the heart of any application and provide a structure for sharing data.

To Navigate to Setup page:

Click on gear icon ? click setup.

Objects and fields involved in Co-Living:

OBJECT :-

- Create a custom object for Total Rooms
- Create a custom object for Customer
- Create a custom object for Room Booking
- Create a custom object for Payment

- Create a custom object for Food Selection
- Create a custom object for Feedback

TASK 1 :- Create a custom object for Total Rooms

To create a custom object, follow these steps:

1. From setup click on object manager.
2. Click create, select custom object.
3. Fill in the label as " Total Room ".
4. Fill in the plural label as " Total Rooms ".
5. Record name: "Total No Of Rooms"
6. Select the data type as "Text".
7. In the Optional Features section, select Allow Reports and Track Field History.
8. In the Deployment Status section, ensure Deployed is selected.
9. In the Search Status section, select Allow Search.
10. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.
11. Leave everything else as is, and click Save.

TASK 2 :- Create a custom object for Customer

To create a custom object, follow these steps:

1. From setup click on object manager.
2. Click create, select custom object.
3. Fill in the label as " Customer1 ".
4. Fill in the plural label as " Customers ".
5. Record name: "Customer Name"

- 6. Select the data type as "Text".**
- 7. In the Optional Features section, select Allow Reports and Track Field History.**
- 8. In the Deployment Status section, ensure Deployed is selected.**
- 9. In the Search Status section, select Allow Search.**

Customer1

Details	
Description	API Name Customer1__c Custom ✓ Singular Label Customer1 Plural Label Customers
Enable Reports	<input checked="" type="checkbox"/>
Track Activities	<input checked="" type="checkbox"/>
Track Field History	<input checked="" type="checkbox"/>
Deployment Status	Deployed
Help Settings	Standard salesforce.com Help Window

TASK 3 :- Create a custom object for Room Booking

To create a custom object, follow these steps:

- 1. From setup click on object manager.**
- 2. Click create, select custom object.**
- 3. Fill in the label as " Room Booking ".**
- 4. Fill in the plural label as " Room Bookings ".**
- 5. Record name: "Room No "**
- 6. Select the data type as "Auto number ".**
- 7. Under Display format enter RN-{000}**
- 8. Enter starting Number as 1**
- 9. In the Optional Features section, select Allow Reports and Track Field History.**
- 10. In the Deployment Status section, ensure Deployed is selected.**
- 11. In the Search Status section, select Allow Search.**

12. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.

13. Leave everything else as is, and click Save.

TASK 4 :- Create a custom object for Payment

To create a custom object, follow these steps:

- 1. From setup click on object manager.**
- 2. Click create, select custom object.**
- 3. Fill in the label as " Payment1".**
- 4. Fill in the plural label as " Payments ".**
- 5. Record name: "Payment No "**
- 6. Select the data type as "Auto number ".**
- 7. Under Display format enter PNO-{000}**
- 8. Enter starting Number as 1**
- 9. In the Optional Features section, select Allow Reports and Track Field History.**
- 10. In the Deployment Status section, ensure Deployed is selected.**
- 11. In the Search Status section, select Allow Search.**
- 12. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.**
- 13. Leave everything else as is, and click Save**

TASK 5 :- Create a custom object for Food Selection

To create a custom object, follow these steps:

- 1. From setup click on object manager.**
- 2. Click create, select custom object.**
- 3. Fill in the label as " Food Selection ".**
- 4. Fill in the plural label as " Food Selections ".**
- 5. Record name: " Food Selection No "**
- 6. Select the data type as "Auto number ".**
- 7. Under Display format enter FS No-{000}**
- 8. Enter starting Number as 1**
- 9. In the Optional Features section, select Allow Reports and Track Field History.**
- 10. In the Deployment Status section, ensure Deployed is selected.**
- 11. In the Search Status section, select Allow Search.**
- 12. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.**
- 13. Leave everything else as is, and click Save.**

TASK 6 :- Create a custom object for Feedback

To create a custom object, follow these steps:

- 1. From setup click on object manager.**
- 2. Click create, select custom object.**
- 3. Fill in the label as " Feedback ".**
- 4. Fill in the plural label as " Feedbacks ".**
- 5. Record name: "Feedback No "**
- 6. Select the data type as "Auto number ".**
- 7. Under Display format enter Fd No-{0000}**
- 8. Enter starting Number as 1**
- 9. In the Optional Features section, select Allow Reports and Track Field History.**
- 10. In the Deployment Status section, ensure Deployed is selected.**
- 11. In the Search Status section, select Allow Search.**
- 12. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.**
- 13. Leave everything else as is, and click Save.**

3. Tab

INTRODUCTION :-

What is Tab: A tab is like a user interface that is used to build records for objects and to view the records in the objects.

Types of Tabs:

1. Custom Tabs

Custom object tabs are the user interface for custom applications that you build in salesforce.com. They look and behave like standard salesforce.com tabs such as accounts, contacts, and opportunities.

2. Web Tabs

Web Tabs are custom tabs that display web content or applications embedded in the salesforce.com window. Web tabs make it easier for your users to quickly access content and applications they frequently use without leaving the salesforce.com application.

3. Visualforce Tabs

Visualforce Tabs are custom tabs that display a Visualforce page. Visualforce tabs look and behave like standard salesforce.com tabs such as accounts, contacts, and opportunities.

4. Lightning Component Tabs

Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app.

5. Lightning Page Tabs

Lightning Page Tabs let you add Lightning Pages to the mobile app navigation menu.

Lightning Page tabs don't work like other custom tabs. Once created, they don't show up on the All Tabs page when you click the Plus icon that appears to the right of your current tabs. Lightning Page tabs also don't show up in the Available Tabs list when you customize the tabs for your apps.

TAB :-

- **Creating a Tab for Total Rooms**
- **Creating a Tab for Customers**
- **Creating a Tab for Room Booking**
- **Creating a Tab for Remaining Objects**

TASK 1 :- Creating a Tab for Total Rooms

1. Go to setup page > type Tabs in Quick Find bar > click on tabs > New (under custom object tab)
2. Select Object(Total Rooms) > Select the tab style.
3. Next (Add to profiles page) keep it as default
4. Next (Add to Custom App) keep it as default & Save.

TASK 2 :- Creating a Tab for Customers

To create a Tab:(Customers)

1. Go to setup page > type Tabs in Quick Find bar > click on tabs > New (under custom object tab)
2. Select Object(Customers) > Select the tab style > Next (Add to profiles page) keep it as default > Next (Add to Custom App) keep it as default > Save.

TASK 3 :- Creating a Tab for Room Booking

To create a Tab:(Room Bookings)

1. Go to setup page ? type Tabs in Quick Find bar ? click on tabs ? New (under custom object tab)

2. **Select Object(Room Bookings) ? Select the tab style ? Next (Add to profiles page) keep it as default ? Next (Add to Custom app) keep it as default ?**

3. **save**

TASK 4 :- Creating a Tab for Remaining Objects

Now create the tabs for Payments, Food Selections, Feedbacks Objects.

Action	Label	Tab Style	Description
Edit Del	Customer	Keys	
Edit Del	Feedbacks	Keys	
Edit Del	Food Selections	Keys	
Edit Del	Payments	Keys	
Edit Del	Room Bookings	Keys	
Edit Del	Total Rooms	Keys	

4. The Lightning App

INTRODUCTION :-

The Lightning App

An app is a collection of items that work together to serve a particular function.
In Lightning Experience, Lightning apps give your users access to sets of objects, tabs, and other items all in one convenient bundle in the navigation bar.
Lightning apps let you brand your apps with a custom color and logo. You can even include a utility bar and Lightning page tabs in your Lightning app.
Members of your org can work more efficiently by easily switching between apps.

TASK 1:- Creating Lightning App

- 1. Go to setup page > search “app manager” in quick find > select “app manager” > click on New lightning App.**
- 2. Fill the app name in app details and branding > Next > (App option page) keep it as default > Next > (Utility Items) keep it as default > Next.**

- 3. To Add Navigation Items: Ctrl and Select the items (Total Rooms, Customers1, Room Booking, Payments1, Food selection, Feedbacks, Reports and Dashboards) from the search bar and move it using the arrow button > Next.**

The screenshot shows the 'Navigation Items' configuration screen in the Lightning App Builder. The left sidebar has 'App Settings' selected. Under 'Navigation Items', 'User Profiles' is selected. The main area is titled 'Navigation Items' with a sub-instruction: 'Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.' Below this is a 'Available Items' list containing various navigation items like Accounts, All Sites, Alternative Payment Methods, Analytics, App Launcher, Appointment Categories, Appointment Invitations, and Approval Requests. To the right is a 'Selected Items' list containing Home, Total Rooms, Customers, Room Bookings, Payments, Food Selections, Feedbacks, Reports, and Dashboards. Navigation arrows between the two lists allow items to be moved.

4. To Add User Profiles:

5. Search profiles (System administrator) in the search bar > click on the arrow button > save & finish.

The screenshot shows the 'User Profiles' configuration screen in the Lightning App Builder. The left sidebar has 'App Settings' selected. Under 'User Profiles', 'User Profiles' is selected. The main area is titled 'User Profiles' with a sub-instruction: 'Choose the user profiles that can access this app.' Below this is a 'Available Profiles' list containing Analytics Cloud Security User, Authenticated Website, B2B Reordering Portal Buyer Profile, Contract Manager, Custom platform User1, Custom platform User2, and Custom User. To the right is a 'Selected Profiles' list containing 'System Administrator'. Navigation arrows between the two lists allow profiles to be moved.

5. Fields & Relationships

INTRODUCTION :-

When we talk about Salesforce, Fields represent the data stored in the columns of a relational database. It can also hold any valuable information that you require for a specific object. Hence, the overall searching, deletion, and editing of the records become simpler and quicker.

Types of Fields

1. Standard Fields
2. Custom Fields

Standard Fields:

As the name suggests, the Standard Fields are the predefined fields in Salesforce that perform a standard task. The main point is that you can't simply delete a Standard Field until it is a non-required standard field. Otherwise, users have the option to delete them at any point from the application freely. Moreover, we have some fields that you will find common in every Salesforce application. They are,

1. Created By
2. Owner
3. Last Modified
4. Field Made During object Creation

Custom Fields:

On the other side of the coin, Custom Fields are highly flexible, and users can change them according to requirements. Moreover, each organizer or company can use them if necessary. It means you need not always include them in the records, unlike Standard fields. Hence, the final decision depends on the user, and he can add/remove Custom Fields of any given form.

TASK 1 :- Creation of fields for the customer1 object

To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Customer1) in search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data Type as a “Phone”
4. Click on next
5. Fill the Above as following:
 - Field Label: Phone no
 - Field Name : gets auto generated
 - Click on Next > Next > Save and new.

To create another fields in an object:

1. Go to setup > click on Object Manager > type object name(Customer1) in search bar > click on the object.
2. Now click on “Fields & Relationships” > New

3. Select Data type as a “Email” and Click on Next

4. Fill the Above as following:

- **Field Label: Email**
- **Field Name :It's gets auto generated**
- **Click on Next > Next > Save and new.**

4. To create another fields in an object:

1. Go to setup > click on Object Manager > type object name(Customer1) in search bar > click on the object.

2. Now click on “Fields & Relationships” > New

3. Select Data type as a “Picklist” and Click on Next

4. Fill the Above as following:

- **Field Label: Current Status**
- **Value - Select enter values with each value separated by a new line**

1. Student

2. Employee

3. Others

- **Select required**
- **Field Name gets auto generated**
- **Click on Next > Next > Save and new.**

TASK 2 :- Creation of fields for the Room Booking object

1. To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.
 2. Now click on “Fields & Relationships” > New
 3. Select Data Type as a “Picklist”
 4. Click on Next
 5. Fill the Above as following:
 - Field Label: Room Sharing
 - Value - Select enter values with each value separated by a new line
1. Single sharing
 2. Double sharing
 3. Triple sharing
 - Select required
 - Click on Next > Next > Save and new.

2. To Create a Fields & Relationship to an Room Booking Object

To create fields & relationship to an object:

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Master-detail Relationship”**
4. **Click on Next**
5. **Click on the Related to drop down and Select the “Customer1” object and click on Next**
6. **Fill the Above as following:**
 - **Change the Field Label: Name**
 - **Field Name : It's gets auto generated**
 - **Click on Next > Next > Save and new.**

To create fields in an object:

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Checkbox”**
4. **Click on Next**
5. **Fill the Above as following:**
 - **Field Label: AC-3000**
 - **Field Name :It's gets auto generated**
 - **Click on Next > Next > Save and new**

4. To create fields in an object:

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Checkbox”**
4. **Click on Next**
5. **Fill the Above as following:**
 - **Field Label: Advance Payment for 1 Month**
 - **Field Name :It's gets auto generated**
 - **Click on Next > Next > Save and new**

5. To create fields in an object:

1. **Go to setup ? click on Object Manager ? type object name(Room Booking) in the search bar ? click on the object.**
2. **Now click on “Fields & Relationships” ? New**
3. **Select Data Type as a “Currency”**
4. **Click on Next**
5. **Fill the Above as following:**
 - **Field Label: Amount**
 - **Length: (18,0)**

- **Field Name :It's gets auto generated**
- **Click on Next > Next > Save and new**

6. To Create a Fields & Relationship to an Object

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” ? New**
3. **Select Data Type as a “Master-detail Relationship”**
4. **Click on Next**
5. **Click on the Related to drop down and Select the “Total Rooms” object and click on Next**
 - **Fill the Above as following:**
 - **Change the Field Label: Total No Of Rooms**
 - **Field Name :It's gets auto generated**
 - **Click on Next > Next > Save and new.**

7. To Create a Rollup Summary Field in “Total Room Object”

1. After Creating the Master- Detail Relationship Than Only you can create the Rollup Summary
 2. Go to setup > click on Object Manager > type object name(Total Rooms) in the search bar > click on the object.
 3. Now click on “Fields & Relationships” ? New
 4. Select Data type as a “Roll-up Summary” and Click on Next
 - Fill the Above as following:
 - Field Label: Rooms Booked
 - Field Name :It's gets auto generated
 - Click on Next
 5. Select the Room Bookings in the Summarized Object
 6. Select the count Radio button in the select Roll-up Type
- Click on Next > Next > Save and new.**
7. Click on Next > Next > Save and new

The image contains two screenshots of the Salesforce Setup interface, both titled "Total Room".

Screenshot 1: Custom Field Definition Edit

- Left Sidebar:** Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules.
- Right Panel:** Edit Total Room Custom Field "Rooms Booked".
 - Field Information:** Field Label: "Rooms Booked", Field Name: "Rooms_Booked", Description: (empty), Help Text: (empty).
 - Data Owner:** User.
 - Field Usage:** --None--.
 - Data Sensitivity Level:** --None--.
 - Compliance Categorization:** Available: PII, HIPAA, GDPR, PCI; Chosen: (empty).

Screenshot 2: Roll-Up Summary Options

- Left Sidebar:** Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules.
- Right Panel:** Roll-Up Summary Options for "Total Room" (Master Object) and "Room Bookings" (Summarized Object).
 - Data Type:** Roll-Up Summary.
 - Calculation Options:** Automatic calculation (Recommended) (radio button selected), Force a mass recalculation of this field (checkbox).
 - Select Roll-Up Type:** COUNT (radio button selected), SUM, MIN, MAX. Field to Aggregate: --None--.
 - Filter Criteria:** All records should be included in the calculation (radio button selected), Only records meeting certain criteria should be included in the calculation.

To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Rooms Booking) in the search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data type as a “Formula” and Click on Next
4. Fill the Above as following:
 - Field Label: Rooms Available
 - Field Name : It's gets auto generated
 - Select the Formula Return Type as “Number”

- **Select the Decimal places as “0” and Click on Next**
- **Click on the Advanced Formula and Enter the value in formula box “30 - ” and Click on insert field than you will find a pop window under the Room Booking select the Total No Of Rooms in the second Column and select the Room Booked in the third column and click on insert “ 30 - Total_No_of_Rooms_r.Rooms_Booked_c ” and Check Syntax**
- **Click on Next > Next > Save and new.**

The image consists of two screenshots of the Salesforce Setup interface, specifically the Object Manager for the 'Room Booking' object.

Screenshot 1: Custom Field Definition Edit - Fields & Relationships

This screenshot shows the 'Edit Room Booking Custom Field' screen. The 'Field Label' is set to 'Rooms Available' and the 'Field Name' is 'Rooms_Available'. Under 'Compliance Categorization', the 'Available' section contains 'PII', 'HIPAA', 'GDPR', and 'PCI', while the 'Chosen' section contains 'None'. The 'Data Owner' is set to 'User'.

Screenshot 2: Advanced Formula Editor

This screenshot shows the formula editor for the custom field. The formula entered is '30 - Total_No_of_Rooms_r.Rooms_Booked_c'. A sidebar titled 'Functions' lists various functions like ABS, ACOS, ADDMONTHS, AND, ASCII, ASIN, etc., with 'Insert Selected Function' at the bottom.

To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data Type as a “Checkbox”
4. Click on Next
5. Fill the Above as following:
 - Field Label: Check in
 - Field Name :It's gets auto generated
 - Click on Next > Next > Save and new

10. To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.
2. Now click on “Fields & Relationships” ? New
3. Select Data Type as a “Checkbox”
4. Click on Next
5. Fill the Above as following:
 - Field Label: Check Out
 - Field Name :It's gets auto generate

- Click on Next > Next > Save and new

TASK 3 :- Creation of fields & Relationship of Payment1 Object.

1. To create fields & relationship to an object:

1. Go to setup > click on Object Manager > type object name(Payment1) in the search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data Type as a “Master-detail Relationship”
4. Click on Next
5. Click on the Related to drop down and Select the Customer1 object and click on Next
6. Fill the Above as following:
 - Change the Field Label: Name
 - Field Name :It's gets auto generated

- Click on Next > Next > Save and new.

2. To create another fields & relationship to an object:

1. Go to setup > click on Object Manager > type object name(Payment1) in the search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data Type as a “Lookup Relationship”
4. Click on Next
5. Click on the Related to drop down and Select the Room Booking object and click on Next
6. Fill the Above as following:
 - Change the Field Label: Room Booking
 - Field Name :It's gets auto generated
 - **Click on Next > Next > Save and new.**

. Creation of another fields for the Payment1 object

To create fields in an object:

1. **Go to setup > click on Object Manager > type object name(Payment1) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Picklist”**
4. **Fill the Above as following:**
 - **Field Label: Payment Mode**
 - **Value - Select enter values with each value separated by a new line**
1. **Cash**
2. **Check**
3. **Credit card**
4. **Debit card**
5. **UPI**
6. **Phonepe**
7. **Gpay**
8. **Paytm**
 - **Select required**
 - **Click on Next > Next > Save and new.**

Cross Object Formula Field:

In Salesforce, a cross-object formula field allows you to create a formula that references fields from related objects. It enables you to perform calculations or display data from related records without the need for custom code or complex workflows.

Why do we need to create the Cross Object Formula Field:

If we want to get the Particular field from another object in that case we will use the Cross object Formula field. For that First we need to create the relationship b/w two objects and relate the field with formula data type.

4. Create a Cross object formula Field in Payment1 Object

1. **Go to setup > click on Object Manager > type object name(Payment1) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Formula”**
4. **Click on Next**
5. **Enter the Field label: Amount and Field name: gets auto generated and click on Next**
6. **In the Advanced Formula Click on the Insert field in the popup Screen Select the Payment1 and in the second drop down select the Room**

Booking and in the three drop down select the Amount field and click on Insert “Room_Booking_r.Amount_c”.

7. **Click on the Check syntax: No syntax errors in merge fields**
8. **Click on Next > Next > Save and new.**

TASK 4 :- Creation of fields for Food Selection Object.

1. To create fields & relationship to an object:

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Master-detail Relationship”**
4. **Click on Next**
5. **Click on the Related to drop down and Select the Customer1 object and click on Next**
6. **Fill the Above as following:**
 - **Change the Field Label: Name**

- **Field Name :It's gets auto generated**
- **Click on Next > Next > Save and new.**

Picklist value sets:

Global picklist value sets let you share the values across objects. Base custom picklist fields on a global value set to inherit its values. The value set is restricted so users can't add unapproved values through the API.

Create a picklist value set:

1. **First click on gear icon and click on setup**
2. **Click on home tab in the Quick find box search for the “ Picklist value sets ”**
3. **Click on the Picklist value set and click on new**
4. **Enter the Label name and API name automatically Generate**
5. **Enter the values with each value separated by a new line**
 - **Sunday**
 - **Monday**
 - **Tuesday**
 - **Wednesday**
 - **Thursday**

- **Friday**
- **Saturday**

6. Check the Use first value as default value and Click on save.

Inactive Values:
No Inactive Values values defined.

Fields Where Used:

Field Label	Object	Data Type	Controlling Field
Breakfast	Food Selection	Picklist	
Dinner	Food Selection	Picklist	

2. Create a picklist Field for Food selection object

To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Food Selection) in the search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data Type as a “Picklist”
4. Fill the Above as following:
 - Field Label: Breakfast
 - Under Value - Select the Use global picklist value set
 - Under the drop down select the Custom Picklist Values
 - Select required
 - Click on Next > Next > Save and new.

3. Create a another picklist Field for Food selection object

To create fields in an object :

1. **Go to setup > click on Object Manager > type object name(Food Selection) in the search bar > click on the object.**

1. **Now click on “Fields & Relationships” > New**
2. **Select Data Type as a “Picklist”**

a.

Fill the Above as following:

- **Field Label: Select Breakfast**
- **Under Value - Enter values, with each value separated by a new line**
 - a. **Idli**
 - b. **Bonda**
 - c. **Dosa**
 - d. **Upma**
 - e. **Vada**
 - f. **Puri**
 - g. **Chapati**
- **Select Checkbox Use First value as default Value**
- **Click on Next > Next > Save and new.**

Field Dependency:

A field dependency refers to a relationship between two fields on an object where the values of one field determine the available values for another field. Field dependencies are commonly used to create picklist field relationships, where the available options in a dependent picklist are determined by the value selected in a controlling picklist.

Need to use Field Dependency:

By using the field dependency we can get the different Values by selecting the different Picklist.

Create a Field Dependency on Breakfast and Select Breakfast Fields in Food Selection Object.

1. **Go to setup > click on Object Manager > type object name(Food Selection) in the search bar > click on the object.**
2. **Now Click on fields & relationships and Click on Field Dependencies**
3. **Now Click on New Option**
4. **Under Controlling Field: Breakfast, Dependent Field: Select Breakfast and Click on Continue**
5. **Under the Sunday Ctrl and select the Picklist values Idli,Dosa,Puri and Click on Include Values in such a way that do for the remaining days and**

click on save

4. To create fields in an object:

1. **Go to setup > click on Object Manager > type object name(Food Selection) in the search bar ? click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Picklist”**
4. **Fill the Above as following:**
 - **Field Label: Lunch**
 - **Under Value - Select the Use global picklist value set**
 - **Under the drop down select the Custom Picklist Values**
 - **Select required**
 - **Click on Next > Next > Save and new.**

5. To create fields in an object:

1. **Go to setup > click on Object Manager > type object name(Food Selection) in the search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Picklist”**
4. **Fill the Above as following:**
 - **Field Label: Select Lunch**
 - **Under Value - Enter values, with each value separated by a new line**

1. **Meals**
2. **Chicken biryani**
3. **Veg biryani**
4. **Veg fried rice**
5. **Egg fried rice**
6. **Chicken fried rice**
7. **Curd rice**
8. **Tomato rice**
9. **Egg noodles**
10. **Chicken Noodles**
11. **Bhagara rice**

- **Select Checkbox Use First value as default Value**
- **Click on Next > Next > Save and new.**

To create a Field dependencies for Dinner and Select Dinner.

- 14. Go to setup > click on Object Manager > type object name(Food Selection) in the search bar > click on the object.**
- 15. Now Click on fields & relationships and Click on Field Dependencies**
- 16. Now Click on New Option**
- 17. Under Controlling Field: Dinner, Dependent Field: Select Dinner and Click on Continue**
- 18. Under the Sunday Ctrl and select the Picklist values Chicken biryani, curd rice, Chicken noodles and Click on Include Values in such a way that do for the remaining days and click on save.**

TASK 5 :- Creation of fields for Feedback Object.

create fields & relationship to an object:

1. **Go to setup > click on Object Manager > type object name(Feedback) in search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Lookup Relationship”**
4. **Click on Next**
5. **Click on the Related to drop down and Select the Customer1 object and click on Next**
6. **Fill the Above as following:**
 - **Change the Field Label: Name**
 - **Field Name :It's gets auto generated**
 - **Click on Next > Next > Save and new.**

2. To create Another fields in an Same object:

1. **Go to setup > click on Object Manager > type object name(Feedback) in search bar > click on the object.**
2. **Now click on “Fields & Relationships” > New**
3. **Select Data Type as a “Picklist”**

4. **Click on Next**
5. **Fill the Above as following:**
 - **Field Label: Roomcleaning**
 - **Field Name :It's gets auto generated**
 - **Under Values select Enter values, with each value separated by a new line**
 1. **Good**
 2. **Satisfaction**
 3. **Bad**
 - **Click on Next > Next > Save and new.**
3. **To create a Another Fields in an Same Object**
 1. **Go to setup > click on Object Manager > type object name(Feedback) in search bar > click on the object.**
 2. **Now click on “Fields & Relationships” ? New**
 3. **Select Data Type as a “Picklist”**
 4. **Click on Next**
 5. **Fill the Above as following:**
 - **Field Label: Internet**
 - **Field Name :It's gets auto generated**
 - **Under Values select Enter values, with each value separated by a new line**
 1. **Good**
 2. **Satisfaction**
 3. **Bad**
 - **Click on Next > Next > Save and new.**
4. **To create a Another Fields in an Same Object**
 1. **Go to setup > click on Object Manager > type object name(Feedback) in search bar > click on the object.**
 2. **Now click on “Fields & Relationships” ? New**
 3. **Select Data Type as a “Picklist”**
 4. **Click on Next**
 5. **Fill the Above as following:**
 - **Field Label: Food**
 - **Field Name :It's gets auto generated**

- Under Values select Enter values, with each value separated by a new line

1. **Good**
2. **Satisfaction**
3. **Bad**
 - Click on Next > Next > Save and new.

5. To create another fields in an same object

1. Go to setup > click on Object Manager > type object name(Feedback) in search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data Type as a “Text area”
4. Click on Next
5. Fill the Above as following:
 - Field Label: Suggestion
 - Field Name :It's gets auto generated
 - Click on Next > Next > Save and new.

TASK 5 :- Creation of fields for The Total Rooms Object.

1. To create fields in an object:

1. Go to setup > click on Object Manager > type object name(Total Rooms) in search bar > click on the object.
2. Now click on “Fields & Relationships” > New
3. Select Data type as a “Formula” and Click on Next
4. Fill the Above as following:
5. Field Label: Rooms Available
6. Field Name : It's gets auto generated
7. Select the Formula Return Type as “Number”
8. Select the Decimal places as “0” and Click on Next

Note: I am Considering “Total No Of Rooms = 30” While creating a new record in

Total Rooms Object.

9. Click on the Advanced Formula “ 30 - Rooms_Booked_c ” and Check Syntax

10. Click on Next > Next > Save and new.

The screenshot shows the 'Custom Field Definition Edit' screen for the 'Rooms Available' field. The formula is defined as `30 - Rooms_Booked__c`. The 'Formula Options' section shows the return type as 'Number'. A tooltip provides an example: `[Fahrenheit = 1.8 * Celsius + 32] More Examples...`. The 'Advanced Formula' tab is selected. A dropdown menu for functions is open, showing categories like ABS, ACOS, ADDMONTHS, AND, ASCII, ASIN, etc. The 'Check Syntax' button is visible at the bottom left of the formula editor.

The screenshot shows the 'Blank Field Handling' configuration screen. It displays the message: 'If your formula references any number, currency, or percent fields, specify what happens to the formula output when their values are blank.' Two options are shown: 'Treat blank fields as zeros' (selected) and 'Treat blank fields as blanks'. At the bottom, there are 'Save', 'Quick Save', and 'Cancel' buttons.

6. Validation rule

INTRODUCTION:-

Validation rules are applied when a user tries to save a record and are used to check if the data meets specified criteria. If the criteria are not met, the validation rule triggers an error message and prevents the user from saving the record until the issues are resolved.

TASK 1:- Create a Validation Rule To An Room Booking Object

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Validation rule” at top > New.**
3. **Enter Rule name “checkbox field” and make the validation should be Active.**
4. **Enter the formula in the formula Box “Advance_payment_for_1month_c = false” and check for syntax error.**
5. **Enter the error message “Checkbox should be checked”**
6. **Select error location as field(Advance payment for 1month)**
7. **click on save**

TASK 2:- Create a Another Validation Rule To An Room Booking Object

1. **Go to setup > click on Object Manager > type object name(Room Booking) in the search bar > click on the object.**
2. **Now click on “Validation rule” at top > New.**
3. **Enter Rule name “check in rule” and make the validation should be Active.**
4. **Enter the formula in the formula Box “ Check_in_c = False ” and check for syntax error.**
5. **Enter the error message “Check box should be checked”**
6. **Select error location as field(Check in)**

7. Profile

INTRODUCTION:-

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. Profile controls “Object permissions, Field permissions, User permissions, Tab settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types, Login hours & Login IP ranges. You can define profiles by the user's job function. For example System Administrator, Developer, Sales Representative.

Types of profiles in salesforce

1. Standard profiles:

By default salesforce provides below standard profiles.

- **Contract Manager**
- **Read Only**
- **Marketing User**
- **Solutions Manager**
- **Standard User**
- **System Administrator.**

We cannot deleted standard ones

Each of these standard ones includes a default set of permissions for all of the standard objects available on the platform.

2. Custom Profiles:

Custom ones defined by us.

They can be deleted if there are no users assigned with that particular one.

TASK 1:- Custom User Profile

To create a new profile:

1. Go to setup > type profiles in quick find box > click on profiles > clone the desired profile (Standard User)
2. Enter profile name (Custom User) > Save.
3. While still on the profile page, then click Edit.
4. Scroll down to Custom Object Permissions and Give All access permissions for Customers, Feedbacks, Food selections, Payments, Room Bookings and Total Rooms.
5. Scroll down and Click on Save.

TASK 1:- Custom Platform User1

To create a new profile:

1. **Go to setup > type profiles in quick find box > click on profiles > clone the desired profile (Standard platform User)**
2. **Enter profile name (Custom platform User1) > Save.**
3. **While still on the profile page, then click Edit.**
4. **Scroll down to Custom Object Permissions and Give only Read access permissions for Customers, Feedbacks, Food selections, Payments, Room Bookings and Total Rooms.**
5. **Scroll down and Click on Save.**

The screenshot shows the Salesforce Setup interface under the Profiles section. It displays a grid of custom object permissions for various objects. The objects listed include Contacts, Push Topics, Payments, and others. For each object, there are checkboxes for Read, Create, Edit, Delete, View All, and Modify All. The 'Customers' object has checkboxes checked for Read, Create, Edit, Delete, View All, and Modify All. The 'Payments' object has checkboxes checked for Read, Create, Edit, Delete, and View All.

TASK 1:- Custom Platform User2

To create a new profile:

1. Go to setup > type profiles in quick find box > click on profiles > clone the desired profile (Standard platform User)
2. Enter profile name (Custom platform User2) > Save.
3. While still on the profile page, then click Edit.
4. Scroll down to Custom Object Permissions and Give Create, Read, Edit and Delete access permissions for Customers, Feedbacks, Food selections, Payments and Room Bookings. And Read Access permission for Total Rooms Object.
5. Scroll down and Click on Save.

This screenshot shows the same Salesforce Setup - Profiles page as the previous one, but with different permission settings. For the 'Customers' object, only the 'Read' checkbox is checked under the 'Basic Access' column. For the 'Payments' object, only the 'Read' checkbox is checked under the 'Basic Access' column. The other objects and their permission settings remain the same as in the first screenshot.

8. Roles

INTRODUCTION:-

A role in Salesforce defines a user's visibility access at the record level. Roles may be used to specify the types of access that people in your Salesforce organization can have to data. Simply put, it describes what a user could see within the Salesforce organization.

TASK 1:- Marketing Role

1. **Go to quick find > Search for Roles > click on set up roles.**
2. **Click on Expand All and click on add role under CEO role.**
3. **Give Label as “Marketing” and Role name gets auto populated.**
4. **Then click on Save.**

Action	Full Name	Alias	Username	Active
Edit	Abhilash Garapati	agar	mani@swamy.com	✓

TASK 2:- Receptionist Role

1. **Go to quick find > Search for Roles > click on set up roles.**
2. **Click on Expand All and click on add role under CEO role.**
3. **Give Label as “Receptionist” and Role name gets auto populated.**
4. **Then click on Save.**

9. Users

INTRODUCTION :-

A user is anyone who logs in to Salesforce. Users are employees at your company, such as sales reps, managers, and IT specialists, who need access to the company's records. Every user in Salesforce has a user account. The user account identifies the user, and the user account settings determine what features and records the user can access.

TASK 1 :- Create User

1. **Activity 1- Create User** Go to setup > type users in quick find box > select users > click New user.
2. **Fill in the fields**
 - **First Name : sandeep**
 - **Last Name : gujja**
 - **Alias : Give a Alias Name**
 - **Email id : Give your Personal Email id**
 - **Username : Username should be in this form: text@text.com**
 - **Nick Name : Give a Nickname**
 - **Role : CEO**
 - **User licence : Salesforce**
 - **Profiles : Custom user**
3. **save.**

TASK 2 :- Create Another User

1. Go to setup > type users in quick find box > select users > click New user.
2. Fill in the fields
 - First Name : Abhilash
 - Last Name : garapati
 - Alias : Give a Alias Name
 - Email id : Give your Personal Email id
 - Username : Username should be in this form: text@text.com
 - Nick Name : Give a Nickname
 - Role : Marketing
 - User licence: Salesforce platform
 - Profiles : Custom Platform User1
3. save

TASK 3 :- Create Another User

1. Go to setup > type users in quick find box > select users > click New user.
2. Fill in the fields
 - First Name : Ganesh
 - Last Name : gelli
 - Alias : Give a Alias Name
 - Email id : Give your Personal Email id
 - Username : Username should be in this form: text@text.com
 - Nick Name: Give a Nickname
 - Role : Receptionist
 - User licence: Salesforce Platform
 - Profiles : Custom Platform user2
3. Save

4.

User Edit

Ganesh gelli

General Information

10. User Adoption

TASK 1 :- Create a Record (customers)

1. Click on App Launcher on the left side of the screen.
2. Search Home Feels & click on it.

3. Click on the Customers Tab.
4. Click new and fill details & Save

TASK 2 :- View a Record (customers)

1. Click on App Launcher on the left side of the screen.
2. Search Home Feels & click on it.
3. Click on Customer Tab.
4. Click on any record name. you can see the details of the Customer.

The screenshot shows a Salesforce Lightning page for a customer named 'Customer1 sandeep'. The 'Details' tab is selected, displaying the following information:

- Customer Name:** sandeep
- Phone no:** 8688956652
- Email:** sirigadadeekshitha@gmail.com
- Permanent Address:** Hyderabad
- Current Status:** Employee
- Owner:** Dikshitha Reddy
- Created By:** Dikshitha Reddy, 02/08/2024, 10:56 pm
- Last Modified By:** Dikshitha Reddy, 02/08/2024, 10:56 pm

TASK 3 :- Delete a Record (customers)

1. Click on App Launcher on the left side of the screen.
2. Search Home Feels & click on it.
3. Click on the Customers Tab.
4. Click on Arrow at right hand side on that Particular record.
5. Click delete and delete again.

The screenshot shows a Salesforce Lightning page for the 'Customers' tab, specifically the 'Recently Viewed' section. The list includes the following items:

- 1 sandeep
- 2 Ragu
- 3 deepu
- 4 pavani
- 5 rajesh
- 6 madhu
- 7 sandeep

A context menu is open for the first item ('sandeep'), with the 'Delete' option highlighted. The menu also includes 'Edit', 'Change Owner', and 'Edit Labels'.

11. Reports

INTRODUCTION:-

Reports give you access to your Salesforce data. You can examine your Salesforce data in almost infinite combinations, display it in easy-to-understand formats, and share the resulting insights with others. Before building, reading, and sharing reports, review these reporting basics.

Types of Reports in Salesforce

1. **Tabular**
2. **Summary**
3. **Matrix**
4. **Joined Reports**

TASK 1:- Create Report

1. **Go to the app > click on the reports tab**
2. **Click New Report.**
3. **Select report type from category or from report type panel or from search panel “Customers with Room Bookings with Total Rooms ” > click on start report.**
4. **Customize your report**
5. **Add fields from left pane as shown below**
6. **Save or run it.**

12. Dashboards

INTRODUCTION :-

Dashboards help you visually understand changing business conditions so you can make decisions based on the real-time data you've gathered with reports. Use dashboards to help users identify trends, sort out quantities, and measure the impact of their activities. Before building, reading, and sharing dashboards, review these dashboard basics.

TASK 1 :- Create Dashboard

1. Go to the app > click on the Dashboard tabs and click on new Dashboard
2. Give a Name and click on Create.
3. Select add component.
4. Select a Report Customer with Room Booking and click on select.
5. Click Add then click on Save and then click on Done.

TASK 2 :- Create Another Dashboard

1. Go to the app > click on the Dashboard tabs and click on new Dashboard.
2. Give a Name and click on Create.
3. Select add component.
4. Select a Report Customer with Room Booking with Payments and click on select.
5. Click Add then click on Save and then click on Done.

13. Flows

INTRODUCTION:-

In Salesforce, a flow is a powerful tool that allows you to automate business processes, collect and update data, and guide users through a series of screens or steps. Flows are built using a visual interface and can be created without any coding knowledge.

Why do we need to create a flow:

To get the Amount Field automatic by the selection of the Room sharing and Ac fields the Amount is generated Automatically in the amount field.

TASK 1 :- Create a Flow

1. **Go to setup > type Flow in quick find box > Click on the Flow and Select the New Flow.**
2. **Select the Record-triggered flow and Click on Create.**
3. **Select the Object as a Room Booking in the Drop down list.**
4. **Select the Trigger Flow when: “A record is Created or Updated”.**
5. **Select the Optimize the flow for: “Actions and Related Records” and Click on Done.**
6. **Under the Record-triggered Flow Click on “+” Symbol and In the Drop down List select the “Decision Element”.**
7. **Enter the Details Label: Field should be Update, API name: Gets Automatically Generated.**
8. **Enter the Outcome Details Label: Single sharing, Outcome API name: Gets Automatically Generated.**
 - **Resource: Select Record.Room sharing.**
 - **Operator: Select Equals.**
 - **Value: Select Single sharing.**

- **Click on “Add Condition”**
- **Resource: Select Record.AC-3000.**
- **Operator: Select Equals.**
- **Value: Select False.**
- **Click on “+” Symbol In the Outcome Order.**

9. Enter the Outcome Details Label: Double sharing, Outcome API name: Gets Automatically Generated.

- **Resource: Select Record.Room sharing.**
- **Operator: Select Equals.**
- **Value: Select Double sharing.**
- **Click on “Add Condition”**
- **Resource: Select Record.AC-3000.**
- **Operator: Select Equals.**
- **Value: Select False.**
- **Click on “+” Symbol In the Outcome Order.**

10. Enter the Outcome Details Label: Triple sharing, Outcome API name: Gets Automatically Generated.

- **Resource: Select Record.Room sharing.**
- **Operator: Select Equals.**
- **Value: Select Triple sharing.**
- **Click on “Add Condition”**
- **Resource: Select Record.AC-3000.**
- **Operator: Select Equals.**
- **Value: Select False.**
- **Click on “+” Symbol In the Outcome Order.**

11. Enter the Outcome Details Label: Single Ac, Outcome API name: Gets Automatically Generated.

- **Resource: Select Record.Room sharing.**
- **Operator: Select Equals.**
- **Value: Select Single sharing.**
- **Click on “Add Condition”**
- **Resource: Select Record.AC-3000.**

- **Operator: Select Equals.**
- **Value: Select True.**
- **Click on “+” Symbol In the Outcome Order.**

12. Enter the Outcome Details Label: Double Ac, Outcome API name: Gets Automatically Generated.

- **Resource: Select Record.Room sharing.**
- **Operator: Select Equals.**
- **Value: Select Double sharing.**
- **Click on “Add Condition”**
- **Resource: Select Record.AC-3000.**
- **Operator: Select Equals.**
- **Value: Select True.**
- **Click on “+” Symbol In the Outcome Order.**

13. Enter the Outcome Details Label: Triple Ac, Outcome API name: Gets Automatically Generated.

- **Resource: Select Record.Room sharing.**
- **Operator: Select Equals.**
